About

I am a software engineering graduate with experience both front-end and back-end development. With hands-on experience in UI/UX design, Vue.js, Java Spring Boot, and database management, I build user-friendly web solutions that integrate intuitive interfaces with robust back-end systems. I thrive in collaborative environments where I can contribute innovative ideas and stay ahead of evolving industry trends.

Experience

Internship at PranWorks Co., Ltd.

Backend Developer | Oct 2024 - March 2025

At **PranWorks Co., Ltd** I interned as a Java Spring Boot Backend Developer. I designed RESTful APIs, managed databases, and implemented secure authentication. Working in an agile, cross-functional team sharpened my debugging, problem-solving, and collaboration skills, significantly boosting my technical expertise and readiness for future challenges.

Personal Website

Front-End Developer & UI/UX Designer | Oct 2024 - Nov -2024

Created a responsive personal portfolio to showcase projects and skills in front-end development and UI/UX design using HTML, CSS, JavaScript, and Vue.js for a user-friendly experience.

Senior Project: ApartEase

Front-End Developer & UI/UX Designer | Mar 2024 - October -2024

Developed ApartEase, a web application that automates utility bill collection for apartment managers using machine learning and image recognition to extract electric meter data from images. This solution reduces manual data entry, minimizes errors, and streamlines property management workflows.

UI/UX Design: E-bike & Scooter Renter

UI/UX Designer | August 2024 - Sepember -2024

In the E-bike and Scooter Renter project, I designed a web application for seamless rentals, a wearable interface for real-time navigation, and an AR experience for route guidance and vehicle locations. This project improved my skills in multi-platform design and integrating innovative technologies into user-centered solutions.

Front-End Web development: Food order and delivery

Front-End Developer & UI/UX Designer | January 2023 - March -2023

This project is about developing a food order and delivery system, including Web UI, Web responsiveness, and connect front-end development. I am experienced in web development tools such as HTML, CSS, JavaScript, Bootstrap, and Mongo DB

DevOps: Web Deploying project

DevOps Engineer | February 2023 - March -2023

I am experience of DevOps practices such as Version controls, AWS cloud services, Docker, Automated testing, Integration testing and Unit testing.

UI/UX Design: CM Trail Project

UI/UX Designer | July 2022 - Auguest -2022

I've contributed to projects like CM Trail as a UI/UX Designer. I conduct user research, design intuitive interfaces, and perform usability tests to ensure seamless user experiences. I'm skilled in design user interface, wireframing, and prototyping.

Education

2020 - 2025   **Chiang Mai University**

Bachelor of Science in Software Engineering
